User needs

As a...	I want to...	So that...
software engineering student	have accessible application that helps my learning	I can learn more effectively
adult learner	be able to learn while on the go	even on a busy day, my downtime is used productively
technology enthusiast	use platforms appropriate to the current available tech	I can have the advantage of quicker and deeper learning
learner that has been outside education for some time	have a tool that makes learning fun	I don't fall behind in my studies because of being out of practice
learner with experience in alternative fields	be able to adjust difficulty in my learning app	I can gradually build up my understanding of the material
student of a short course	have easy access to refresher material even after the course ends	regardless of my future placement, the knowledge is retained
